Art Unit: 3634

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I Figures 1-5

Group II Figure 8

Group III Figure 9

Group III Figure 18

Group IV Figure 19

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Group I	Claims 14, 16-23 and 26
Group II	Claim 3
Group III	Claim 5

Art Unit: 3634

Group IV Claim 25

The following claim(s) are generic: 1, 2, 4, 6-13, 15, 24, 27-33 and 43

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species of Group I includes the special technical features of an automotive vehicle seat, the species of Group II includes the special technical features of a specific type of gear housing which includes L-shaped members, the species of Group III includes the special technical features of a specific type of gear housing which includes a U-shaped member and a planar member, the species of Group IV includes the special technical features of a window lifter. The special technical features of each of the groups are not related to one another. A vehicle seat is not related to the specific types of housing in Groups II and III or is not related to a window lifter. Likewise, the specific types of housing in Groups II and III are not related to each other or to a window lifter. Finally, a window lifter is not related to a vehicle seat or to the specific types of housing in Groups II and III.

A telephone call was made to Mark Garscia on May 20, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
